

Care that reads at a glance.

One visual language for the Patient App and the Doctor App: calm surfaces, big headers you read from far, and controls where your thumb already is.

Blue · trust & action

Chandan · warmth

Sage · health

The mark sets the warm palette. Blue does the work.

01

Look up top, reach down low

A big title fills the top third to read. Actions such as search, slots, Accept and Pay sit in the lower two-thirds, within thumb reach. The title folds into a slim bar as you scroll.

02

One family, three widths

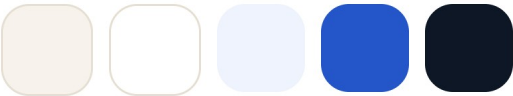

Anek goes wide for headers, normal for reading and narrow for fees and times. It is one typeface in two scripts, matching the Devanagari mark.

Aa Aa Aa क

03

Flat, tonal, rounded

There are no drop shadows. White cards on a cream ground, grouped into big 26px blocks, show the depth.

04

Blue acts, Chandan welcomes

Anything you tap is blue. Chandan appears in greetings, ratings, the wordmark and the "Requested" moment. It is never used for a button, so the two roles don't mix.

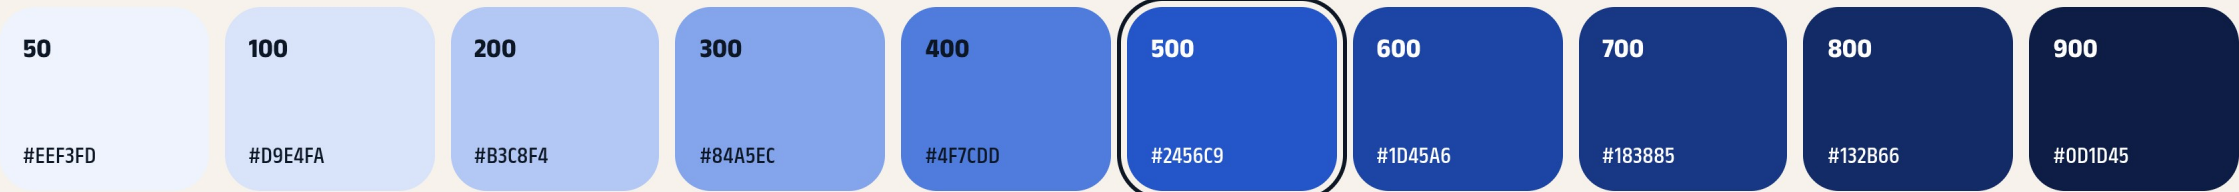

Blue, Chandan & Sage

Blue means trust, so it carries every action. Chandan and Sage come straight from the logo: the copper wordmark, the gold halo and the leaves. Each hue has a 10-step ramp. The outlined swatch is the brand value.

Aa

Anek

A variable family by Ek Type, Mumbai, with a width axis from 75 to 125 and matching Devanagari. Samsung pairs a wide display face with a plain UI face. CHARAK gets both from one family, so the brand sounds the same in English, Hindi and Marathi.

20/24 · 600 · 80

Numbers always use tabular figures (font-variant-numeric: tabular-nums) so fees and times line up in lists. Headers never go below 118 width, so the brand stays recognisable even on small screens.

Quick out, soft landing

Everything moves the way One UI moves: it leaves fast and settles slowly, so taps feel instant but nothing jerks. Every tile on the right is live. Each phone screen has its own motion notes underneath it.

Tokens

	motion.press Buttons, tiles, rows · scale 0.96 cubic-bezier(0.22, 1, 0.36, 1)	150
	motion.standard Tabs, segments, status, colour cubic-bezier(0.33, 0, 0.1, 1)	300
	motion.emphasized Enter, Now Bar, sheets, card → screen cubic-bezier(0.22, 1, 0.36, 1)	450
	motion.exit Dismiss, heads-up out, close cubic-bezier(0.4, 0, 1, 1)	200
	motion.stagger Added per item on screen enter max 6 items → 240ms tail	+40
	motion.live Pulse on anything happening now standard, looping	1600
	motion.header Large title fades, app bar appears linear, tied to scroll 170–230px	scroll

Rules

- 1 Only one hero motion per screen. The rest stays quiet.
- 2 Nothing longer than 450ms. People are waiting on care, not a show.
- 3 Enter from where it lives: sheets rise, heads-up drops, lists lift 20px.
- 4 Numbers never animate their value. Fees and times stay tabular so they don't jitter.
- 5 With Reduce motion on, everything becomes a 150ms fade and loops stop.

Every movement on the screen above, in order. Tokens are on the Motion board.

1

Screen enter

450ms

emphasized

On open

Title, search, card, then tiles and list rise 20px and fade in, 40ms apart.

2

Large title → app bar

scroll

header

Scroll 0–230px

The greeting fades and drifts up at 0.35× scroll speed. From 170px the small "Home" title slides in and the bar turns to frosted glass.

3

Now Bar arrives

450ms

emphasized

600ms after enter

The live consult pill rises 90px from above the tab bar. Its blue dot pulses every 1.6s while the consult is upcoming.

4

Now Bar expands

450ms

emphasized

Tap the pill

Height grows 60 → 140px to show progress and the Join button. The countdown ticks each second without jitter because the digits are tabular.

5

Press

150ms

press

Any tile, card, row

Scales to 0.96 while held and springs back on release.

6

Reduce motion

150ms

—

System setting

Every entrance becomes a plain fade and the pulse stops.

MOTION NOTES

Patient · Doctor & slot

Every movement on the screen above, in order. Tokens are on the Motion board.

1

Screen enter

450ms

emphasized

From a doctor card

The profile, slot card and note stagger in 80ms apart. The price sheet rises from the bottom 200ms later.

2

Online / Home thumb

300ms

standard

Tap a segment

The white thumb slides across while the label colours cross-fade. The slot grid swaps to the new mode's times.

3

Day & slot select

300ms

standard + pop

Tap a day or time

Fill fades to blue. The chosen slot pops 0.9 → 1.05 → 1 so it's clear the choice landed.

4

Button wakes up

300ms

standard

First slot picked

The button fades from grey to blue, the label changes and an arrow slides in 8px.

5

Save doctor

300ms

pop

Tap the heart

The heart fills with chandan and pops once.

6

Large title → app bar

scroll

header

Scroll 120–180px

The doctor's name moves from the big header into the frosted top bar.

Doctor • Requests

Every movement on the screen above, in order. Tokens are on the Motion board.

1

Screen enter

450ms

emphasized

On open

The header, availability switch and request cards rise in, 40ms apart.

2

Heads-up request

450 / 200ms

emphasized / exit

2.5s after open (demo)

A blue banner drops from the top. Later or Review sends it back up quickly (exit curve), and the new card slides down into the list.

3

Availability switch

300ms

emphasized

Tap the switch

The thumb slides 22px, the track fades blue ↔ grey and the helper text changes with it.

4

Accept / Decline

300ms

standard

Tap a button

The chip cross-fades to Accepted (blue) or Declined (dim red). A declined card fades to 50% so it recedes without jumping.

5

Now Bar • payment

450ms

emphasized + live

First accept

An ink pill rises above the tab bar with a chandan pulse and a looping shimmer until the patient pays.

6

Large title → app bar

scroll

header

Scroll 150–210px

The title "Requests" moves into the frosted ink bar.
